¹ Notes on using the cover page:

1. The cover page could be used as a **complement** to submitting detailed forms adopted at the [First and Second] Meetings of the States parties in instances when the information to be provided in some of the forms in an annual report is the same as it would be in past reports. That is, when using the cover page, only forms within which there is new information would need to be submitted.
2. The cover page could be used as a **substitute** for submitting detailed forms adopted at the [First and Second] Meetings of the States parties only if all of the information to be provided in an annual report is the same as in past reports.
3. If an indication is made on the cover sheet that the information to be provided with respect to a particular form would be unchanged in relationship to a previous year's form, the date of submission of the previous form should be clearly indicated.

Reporting for the time period: January 30, 2020 to December 31 2020

Form A National implementation measures

Article 7.1 "Each State Party shall report to the Secretary-General ... on:

The national implementation measures referred to in Article 9."

Remark: In accordance with Article 9, "Each State Party shall take all appropriate legal, administrative and other measures, including the imposition of penal sanctions, to prevent and suppress any activity prohibited to a State Party under this Convention undertaken by persons or on territory under its jurisdiction or control".

State [Party]: Ethiopia reporting for time period from **January 2020** to **December 2020**
Measures: Supplementary information (e.g., effective date of implementation & text of legislation attached).

No legal, administrative and other measures were adopted within the period under consideration. The existing pieces of legislation in the main legal and judicial system of Ethiopia are adequate enough to charge, prosecute and punish any national or foreign citizen who uses, produces, transfers, stores or encourages others to use antipersonnel mines within Ethiopia territory. For additional information refer to the report submitted in 2017 for information that has been provided by the Federal Democratic Republic of Ethiopia on measures that have been taken in the past.

Form B Stockpiled anti-personnel mines

Article 7. 1 "Each State Party shall report to the Secretary-General ... on:

b) The total of all stockpiled anti-personnel mines owned or possessed by it, or under its jurisdiction or control, to include a breakdown of the type, quantity and, if possible, lot numbers of each type of anti-personnel mine stockpiled."

State [Party]: **Ethiopia** reporting for time period from **January 2020** to **December 2020**

Type	Quantity	Lot # (if possible)	Supplementary Information
N/A	N/A	N/A	The Federal Democratic Republic of Ethiopia had declared the completion of destruction all known stockpiled anti-personnel mines on April 2, 2009.

Form C Location of mined areas

Article 7.1 "Each State Party shall report to the Secretary-General ... on:

c) To the extent possible, the location of all mined areas that contain, or are suspected to contain, anti-personnel mines under its jurisdiction or control, to include as much detail as possible regarding the type and quantity of each type of anti-personnel mine in each mined area and when they were emplaced."

State [Party]: **Ethiopia** reporting for time period from **January 2020 to December 2020**

1. Areas that are confirmed and suspected to contain mines* These are the remaining mapped contamination as of December 2020.

* Please see attached table with data on each mined area.

During the last April 2019 report, there were 261 areas in Ethiopia known and suspected to contain anti-personnel mines totaling 1,056,349,551 square meters remain to be addressed. See table 1 for complete list of these areas. Areas known or suspected to contain anti-personnel mines remain in 261 wereda/districts in all six regions of Ethiopia as follows:

Region /Province	Number of areas known to contain mines	Number of areas suspected to contain mines	Total number of areas known or suspected to contain mines	Amount of area known to contain mines(m ²)	Amount of area suspected to contain mines(m ²)	Total amount of area known or suspected to contain mines(m ²)

*Summary of areas known or suspected to contain anti-personnel mines as of 30 April 2019
(Table 1)*

In its 2nd request for an extended deadline, which was submitted in 2019, the Federal Democratic Republic of Ethiopia made time-bound commitments to enhance efforts to implement Article 5 of the Convention. The Federal Democratic Republic of Ethiopia has made projections for the year when each of the remaining 261 areas known or suspected to contain anti-personnel mines would be released. In 2019-2025, it is projected that 35 areas known to contain anti-personnel mines totaling 6,304,538 square meters and 226 areas suspected to contain anti-personnel mines totaling 1,050,045,013 square meters to be released in six regions of the country.

As of 30 December 2020, Federal Democratic Republic of Ethiopia was able to cancel and reduce 109 areas measuring 330,285,076 square meters. Previously suspected hazardous areas are now no longer suspected from anti-personnel mines threat. Areas are declared safe for social and development activities. The methodology used to declare the area safe comprises: 10,316,621 Square meters reduced using TS and 318,216,508 Square meters cancelled using NTS. (See Annex III.) Areas were released in three weredas/districts with the effort resulting in implementation being declared complete in Kebribeyah, Gerbo and Sagiagi weredas /District in Somali region. In the course of carrying out operations to release these areas, a total of 128 anti-personnel mines and 6,037 UXO) were destroyed. The remaining area to be addressed is 152 areas measuring 726,064,475 Square Meters will be part of the next plan until December 2025. For information see the next table 2 implemented 1 May 2019-April 2020. All the areas were released using manual clearance method because the remaining area is mountain and most of the area is remote in the border of the country.

It has to be noted that the global COVID 19 pandemics had affected the Ethiopian mine action sector. (Detail reported under form J)

Article 7.1 "Each State Party shall report to the Secretary-General ... on:

i) The measures taken to provide an immediate and effective warning to the population in relation to all areas identified under paragraph 2 of Article 5."

Remark: In accordance with Article 5, para.2: "Each State Party shall make every effort to identify all areas under its jurisdiction or control in which anti-personnel mines are known or suspected to be emplaced and shall ensure as soon as possible that all anti-personnel mines in mined areas under its jurisdiction or control are perimeter-marked, monitored and protected by fencing or other means, to ensure the effective exclusion of civilians, until all anti-personnel mines contained therein have been destroyed. The marking shall at least be to the standards set out in the Protocol on Prohibitions or Restrictions on the Use of Mines, Booby-Traps and Other Devices, as amended on 3 May 1996, annexed to the Convention on Prohibitions or Restrictions on the Use of Certain Conventional Weapons Which May Be Deemed to Be Excessively Injurious or to Have Indiscriminate Effects".

State [Party]: **Ethiopia** reporting for time period from **January 2020** to **December 2020**

[Narrative:] *For Ethiopia Explosive Ordnance Risk Education (EORE) continues to be a priority. The government fully appreciates the dangers posed by landmines (EOs), and such EORE activities continue to focus more on areas where NTS and TS activities are taking place and on communities affected by landmines. During the reporting period ad-hoc EORE activities were implemented by MoND MAO, a field operator during assessment undertaken in Kabridahr, Gerbo, Sagiagi and Bale districts.*

Form J: Other Relevant Matters:

The global COVID 19 pandemic has greatly affected the Ethiopia mine action sector. Almost, most of the field activities were suspended, mostly affecting the Somali region where a land release and systematic clearance had been planned. The local lockdowns had affected on operational staff deployment in one side but also this was a moment where resilience and demining leadership was proven as some of the demining units' personnel were also deployed to combat the spread of the COVID 19 pandemic through community engagement and support activities.

Despite of this global challenge, Ethiopia undertook pragmatic steps in improving the overall performance of the mine action sector in the country. This was a joint effort from the Government, and partners including the United Nations, a renewed effort in assessing current gaps and subsequent actions are being considered. At the end of 2020, significant achievements were made including mine action assessment undertaken by UNAMS in Somali region and discussion with international humanitarian Mine Action operators have commenced to identify possible area of collaboration to support Mine Action in Ethiopia.

Landmine contamination is recorded in six out of the ten states in Ethiopia. 62% of the areas known to contain anti-personal mines is found in Somali region. To date, Ethiopia has a total of 29 Confirmed contaminated areas and 152 Suspected hazardous areas accounting in total for 726.68 square kilometers. As indicated during the 2019 extension request, a baseline survey to revise contamination data from the 2001–04/7 landmine impact survey is paramount.

Annex I: Map² of Areas known and suspected to contain anti-personnel mines as of 30 April 2020

² Map depicting regions contaminated by Landmines and Explosive Remnants of War (ERW). Small pockets of contamination is also recorded in Oromia region specifically East Hararige, E Shoa and Wolega areas.
