

**CONVENTION ON THE PROHIBITION OF THE USE, STOCKPILING, PRODUCTION AND TRANSFER OF
ANTI-PERSONNEL MINES AND ON THEIR DESTRUCTION**

Reporting Formats for Article 7 ¹

STATE PARTY:

REPUBLIC OF ANGOLA

DATE OF SUBMISSION

POINT OF CONTACT

NATIONAL INTERSECTORAL COMMISSION FOR DEMINING AND
HUMANITARIAN ASSISTANCE TO MINE VICTIMS (CNIDAH)
RUA FURTADO PINHEIRO N° 32 CIDADE ALTA, LUANDA – ANGOLA
TELE/FAX: + 244 222372218

Form A National implementation measures

Article 7.1 "Each State Party shall report to the Secretary-General ... on:
 a) The national implementation measures referred to in Article 9."

Remark: In accordance with Article 9, "Each State Party shall take all appropriate legal, administrative and other measures, including the imposition of penal sanctions, to prevent and suppress any activity prohibited to a State Party under this Convention undertaken by persons or on territory under its jurisdiction or control".

State Party: Angola reporting for time period from April 2006 to March 2007

Measures	Supplementary information (e.g., effective date of implementation & text of legislation attached).
<p>Additional legal measures were taken during the referred period.</p> <p>In the scope of the reforms in Mine Action sector, the government through a Dispatch from the presidency of the republic of Angola published in the Governments newsletter, series- n°145, n° 28/05 which establishes the Demining Executive Commission (CED) reporting directly to the President of the Republic, as Chief of the Government and Chief in command of the Angolan Armed Forces, and coordinated by the Minister of Social reintegration and whereby it integrates the following organs:</p> <ul style="list-style-type: none"> A. Angola Armed Forces B. National Reconstruction Cabinet C. National Institute for Demining <p>2 – The Demining Executive Commission performs the following duties/tasks:</p> <ul style="list-style-type: none"> a) Update the National Demining Plan and present a plan of needs, with a budget in coordination with CNIDAH; b) Defines the mode of implementation for the referred plan based on the previous point and in accordance with the operational plan; c) Manages, coordinate and control the activities of all national and international partners involved in mine clearance (survey and delimitation of mined areas, removal or disposal of mines and unexploded ordnance) based on the operational plan; d) Ensure the absence of mines and unexploded ordnances, in resettlement areas for the unfavourable population and/or for economic interest; e) National and international operators involved in demining activities should comply with legal and administrative procedures with respect to legalization before CNIDAH. <p>We also have to highlight that on September 6th 2006, the Council of Ministers of the Republic of Angola approved the National Mine Action Strategy covering the period of 2006-2011 prepared by the National Intersectoral Commission for Demining and Humanitarian Assistance to Mine Victims (CNIDAH), which also considered the inputs from the Mine Action Technical Guidelines from the United Nations (including international operational standards), and also took into consideration the various components of mine action namely; demining, mine risk education, mine victim assistance, stockpile destruction and advocacy, with clear definition of management mechanisms, coordination, establishment of priorities and implementation and evaluation of mine action activities among all stakeholders.</p>	<p>See previous report of Article 7 for legal measures that have already been taken.</p>

Form B Stockpiled anti-personnel mines

Article 7.1 "Each State Party shall report to the Secretary-General ... on:

b) The total of all stockpiled anti-personnel mines owned or possessed by it, or under its jurisdiction or control, to include a breakdown of the type, quantity and, if possible, lot numbers of each type of anti-personnel mine stockpiled."

State Party: **Angola**

reporting for time period from **April 2006 to March 2007**

Form E Status of programs for conversion or de-commissioning of APM production facilities

Article 7.1 "Each State Party shall report to the Secretary-General ... on:
 e) The status of programs for the conversion or de-commissioning of anti-personnel mine production facilities."

State Party: **Angola** reporting for time period from **April 2006 to March 2007**

Indicate if to "convert" or "decommission"	Status (indicate if "in process" or "completed")	Supplementary information
		As mentioned in previous report, there have never been any anti-personal mines manufacture in Angola and therefore there is no facility for that purpose

Form F Status of programs for destruction of stockpiled APMs

Article 7.1 "Each State Party shall report to the Secretary-General ... on:

f) The status of programs for the destruction of anti-personnel mines in accordance with Articles 4 and 5, including details of the methods which will be used in destruction, the location of all destruction sites and the applicable safety and environmental standards to be observed."

State Party: **Angola**

reporting for time period from **April 2006 to March 2007**

1. Status of programs for destruction of stockpiled APMs (Article 4)

Description of the status of programs including:	
Location of destruction sites	In the Army stockpile in the military regions (see form G)
Methods	Mine disposal in de-mining zones is often done by detonating an electrical explosive charge unit system and pirotechnique.
Applicable safety standards	The safety measures taken in APMs disposal programmes follow the SOP and IMAS adoption, specially IMAS 11.10 (Guide for distruction of stockpiled APMs)
Applicable environmental standards	Mine disposal is often done in order not to affect the existing the infrastructures and the natural envoirment.

Form G APMs destroyed after entry into force

Article 7.1 "Each State Party shall report to the Secretary-General ... on:

g) The types and quantities of all anti-personnel mines destroyed after the entry into force of this Convention for that State Party, to include a breakdown of the quantity of each type of anti-personnel mine destroyed, in accordance with Articles 4 and 5, respectively, along with, if possible, the lot numbers of each type anti-personnel mine in the case of destruction in accordance with Article 4"

State Party: **Angola** reporting for time period from **April 2006 to March 2007**

2. Destruction of APMs in mined areas (Article 5)

Type	Quantity	Supplementary information
Miscelaneous	24.792	Mines removed in various areas by several demining operators. Total demined area 6,876,513 m²
TOTAL	24.792	

Form H Technical characteristics of each type produced/owned or possessed

Article 7.1 "Each State Party shall report to the Secretary-General ... on:

h) The technical characteristics of each type of anti-personnel mine produced, to the extent known, and those currently owned or possessed by a State Party, giving, where reasonably possible, such categories of information as may facilitate identification and clearance of anti-personnel mines; at a minimum, this information shall include the dimensions, fusing, explosive content, metallic content, colour photographs and other information which may facilitate mine clearance"

State Party: Angola reporting for time period from April 2006 to March 2007

1. Technical characteristics of each APM-type produced

Form I Warning Measures to the Population

Article 7.1 "Each State Party shall report to the Secretary-General ... on:
 i) The measures taken to provide an immediate and effective warning to the population in relation to all areas identified under paragraph 2 of Article 5."

Remark: In accordance with Article 5, para.2: "Each State Party shall make every effort to identify all areas under its jurisdiction or control in which anti-personnel mines are known or suspected to be emplaced and shall ensure as soon as possible that all anti-personnel mines in mined areas under its jurisdiction or control are perimeter-marked, monitored and protected by fencing or other means, to ensure the effective exclusion of civilians, until all anti-personnel mines contained therein have been destroyed. The marking shall at least be to the standards set out in the Protocol on Prohibitions or Restrictions on the Use of Mines, Booby-Traps and Other Devices, as amended on 3 May 1996, annexed to the Convention on Prohibitions or Restrictions on the Use of Certain Conventional Weapons Which May Be Deemed to Be Excessively Injurious or to Have Indiscriminate Effects".

State Party **Angola** **Reporting period from: April 2006 to March 2007**

Aiming at contributing towards the reduction of risks of incidents caused by mines or other explosive ordnances, informing and educating the populations on how to identify the problem as well to change their behaviour before this constant and eminent danger, the education and Prevention of Mine Accidents Programme, also known as PEPAM, in the period that the document reports, was developed in its majority by national NGOs which is mainly comprised of MRE operators, conducted punctual together with International Demining Operators.

From the activities undertaken by PEPAM Organizations (a total of 17, in which 13 are local/national and the others are international), good results have been achieved aiming at complying with the pre-defined objectives, which is to:

- Enable free movement of people and goods;
- Create sustainable networks within the communities (local activists);
- Facilitate the demining process;
- Advocacy (for the marking of suspected mined areas);
- Change people's behaviour before the danger of mines and UXOs.

With regards to the qualitative results of actions performed by PEPAM operators:

- Announce the location of ordnance, mined/suspected areas affecting the population benefiting from the mine awareness programme, which in some cases facilitates the demining process undertaken by specialized by demining organizations (marking and EOD)
- Reduction of incidents with mines and UXOs in target communities from the programme and surroundings

- Data reported to Operators and the different sources of information such as the community itself, governmental and non-governmental institutions, had enabled the information of accidents and incidents to be channelled through the data base at CNIDAH central, whose duty is to update the information management system on permanent basis
- Marking and signalling of mined areas by the beneficiary population in mine awareness sessions
